Présentation

Activité détaillée

SeaOwl Technology Solutions is a high-tech company that designs and develops innovative equipment as well as installs and maintains systems for Naval Defense and Maritime Protection. Worldwide notorious for having invented the first Naval Hand-Held Optical Target Designator for Naval Defense or the unrivalled Maritime Early Warning system to protect oil platforms in the most sensitive environment in the world for oil players, we have a very dynamic innovation policy investing nearly 25% of our turnover in R&D activities.
